

critical questions to consider:

Is the function well achieved?
Is it easy to open and hold?
Is it easy to pour the liquid out without splashes everywhere?
Does the shape work for the function?
Does the material work for the function?

General critical questions in design context:

Purpose: What are we trying to solve?
Questions: What are the questions?
Information: What is the information needed to understand the problem?
Conclusions: How do other reached different solutions?
Concepts: What is the main concept behind the current ideas?
Implications: How can we implicate the new ideas?
The point of View: What are the different point of views relate to the problem?

HOW TO BE CRITICAL?
